PROFESSIONAL SUMMARY

First-semester Software Engineering student with hands-on experience building Python-based tools and exploring web development and IT automation. Passionate about system administration, scripting, and solving practical problems through code. Seeking an internship or assistant role to apply and grow technical and teamwork skills.

EDUCATION

B.Sc. Software Engineering (First Semester)

University of the Punjab, Lahore — Expected Graduation: 2030

Relevant Coursework: Introduction to Programming (Python), Calculus I, Discrete Mathematics, Computing Fundamentals

Additional Training

- Google IT Automation with Python Professional Certificate — In Progress
 - AI Web Development — DTAN, Lahore
 - Web Development Fundamentals — DTAN, Lahore
-

TECHNICAL SKILLS

- **Languages:** Python, HTML, CSS, JavaScript (basic)
- **Automation & Scripting:** File handling, system monitoring, task scheduling (cron/Windows Task Scheduler concepts), shell interactions
- **Developer Tools:** Git, GitHub, VS Code, Command Line (Linux/Windows)
- **Cloud & Backup:** Basic use of cloud storage APIs, automated backup logic (planned/developed)
- **Concepts:** Procedural programming, error handling, log parsing, CRON scheduling, system resource monitoring

- **Soft Skills:** Problem-solving, self-directed learning, time management, clear documentation
-

PROJECTS

System Manager CLI (Python) — Ongoing Personal Project |

A modular command-line tool to automate common system administration tasks.

Shows the ability to design, structure, and maintain a multi-feature application from scratch.

- **Health Monitor:** Real-time monitoring of CPU, memory, and disk usage with visual alerts.
- **Backup Logic:** Automated file backup to local destinations with versioning; cloud integration planned.
- **Logs Analysis System:** Parses system/application logs to identify errors, warnings, and usage patterns.
- **Temporary File Organizer:** Scans, organizes, and securely deletes temporary files to free disk space.
- **Scheduled Tasks:** Built-in scheduler runs health checks or backups at user-defined intervals.

Calculator App (Python) — Introductory Project

- Built an interactive command-line calculator supporting basic arithmetic operations.
 - Implemented input validation and continuous calculation loops to practice error handling.
 - Used as a foundation to understand Python syntax, functions, and user interaction.
-

LEADERSHIP & ACTIVITIES

Peer Learning & Study Groups

Self-Organized, University of the Punjab

- Organized weekly programming study sessions to review concepts and solve coding exercises.
 - Helped classmates troubleshoot Python errors and explain basic programming ideas, strengthening my own understanding.
-

CERTIFICATIONS & COURSES

- Google IT Automation with Python (Coursera) — In Progress
 - AI Web Development — DTAN (In Progress)
 - Web Development — DTAN
-

LANGUAGES

- Urdu — Native
- English — Fluent
